## Relational Security releases RSAM™ v6.0

Secaucus, NJ - Oct 29, 2008 - Relational Security Corporation, the makers of RSAM™ (best-of-breed risk assessment & compliance management software), announced the release of its 6<sup>th</sup> generation of RSAM™ software. RSAM™ 6.0 provides many important enhancements to the existing RSAM™ v5 feature set while also allowing customers to take advantage of the new and powerful ‘Risk Analytics’ module.

### The RSAM™ 6.0 Suite includes:

- RSAM™ 6.0
- RSAM™ Risk Analytics module

“This is the most exciting release yet. RSAM™ 6.0 enables our customers to greatly automate the management of their risk & compliance processes. We have already seen a tremendously positive impact with our “early adopter” customers. As more and more data & stakeholders get involved with risk management initiatives, customers require an easy way to intelligently analyze, and automatically manage their risks and findings. RSAM 6.0 fulfills this need quickly and efficiently.” said Vivek Shivananda, President and Chief Executive Officer. “Now-a-days organizations are challenged with more and more risk & compliance initiatives, but are being provided with less and less resources. This makes it imperative for customers to quickly gain overall visibility of their risk & compliance postures, intelligently prioritize issues based on business context and adopt risk-driven workflows to stay on top of their critical issues. RSAM 6.0 holds the key.”

### New RSAM™ Risk Analytic Module

RSAM™’s Risk Analytics module adds an unprecedented degree of functionality & automation to RSAM! This single module enables RSAM to handle any number of customer scenarios and greatly expands RSAM’s functionality in several dimensions. Using this module, customers are able to define their own custom rule-sets to automate user-related & scheduled events. “Risk Analytics will change the way customers think about risk & compliance management and provides process-enabling mechanisms to automate the management of data and workflow,” said Kevin Day, CTO of Relational Security.

“Existing customers and new customers alike are going to love this new module.”

### About Relational Security Corporation & RSAM™

Relational Security Corporation (RelSec) is the provider of the industry’s leading Risk and Compliance Management Software - RSAM™. RelSec customers span a wide range of organizations from large global Fortune 500 organizations with unique and complex requirements to smaller single-site companies looking for structure, out-of-the-box deployment and consistency at a reasonable price-point. RSAM™ solutions are modular, and can be rapidly deployed, to help organizations automate their risk & compliance management processes in areas such as Risk Assessment, Compliance Management, Remediation Tracking, Audit Automation, Policy Exception Management, Vulnerability Tracking, Incident Management, Risk Inventory, and Custom risk & compliance solutions that can be built on the fly using the RSAM™ platform.
