

BitSight Security Ratings Connector for Rsam Vendor Risk Management

Rsam has integrated BitSight Security Ratings into its Vendor Risk Management module to better enable organizations to identify, prioritize, and mitigate the risk inherent in sharing sensitive data with third parties. The combined solution brings BitSight's analysis, rating, and continuous monitoring capabilities into the industry's leading Vendor Risk Management platform. BitSight's daily security ratings provide organizations the insight they need to bring a more holistic view into their vendor risk profiles, and Rsam's best-of-breed workflow engine automates ongoing monitor notifications, reviews, and responses to changing security risk.

A Data-Driven Approach to Vendor Risk Management

BitSight has solved the complex problem of vendor risk management from a cybersecurity perspective. The BitSight Security Ratings Connector for Rsam Vendor Risk Management delivers timely, data-driven analyses of your vendors' security performance. BitSight's service offering continuously analyzes, rates, and monitors companies' security postures, all from the outside. New ratings are generated on a daily basis, giving you continuous visibility into the security of your assets. With the ability to drill down into the security details used to generate an organization's rating, you can have intelligent, data-driven conversations with your vendors about their security posture. For the first time, you can manage risk and make business decisions based on evidence, enabling you to not just trust but also verify your vendors' security posture.

Features

- BitSight's overall company rating and component grades are visible from within your vendor risk assessments, supplementing information collected through the questionnaire process
- Side-by-side comparisons integrate BitSight Security Ratings with other risk factors
- Global dashboards provide visibility into security posture across your vendor population
- Ongoing monitoring alerts ensure continued awareness of your vendors' changing security posture, and review-and-response workflow automates your organization's continued response to changing risk

About Rsam

Rsam helps organizations meet their security, risk and compliance goals quickly, even as requirements are always changing. Our enterprise software platform uses a relational architecture and captures data in a single, centralized repository. Unlike other systems, we don't hard-wire dependencies based on requirements that were probably outdated before implementation began. Instead, the Rsam platform is built to adapt and puts the user in control. Learn more at rsam.com.
