

In today's highly regulated business environment, you have to comply with a multitude of regulations and internal policies. Some are universal, others are unique to specific jurisdictions, and they are always evolving.

Rsam Policy Management

Rsam Policy Management makes it easy to author, track and manage policies centrally – mapping them to regulatory standards, risk frameworks and business objectives. Write policies directly into Rsam, or import from a file. Automated workflow and alerts facilitate policy management all the way through to review and approval.

With Rsam, your organization will be more efficient and knowledgeable about its risk position while keeping up with current compliance mandates.

Features

- Centrally manage the entire policy lifecycle Create policy structures with unlimited hierarchical levels
- Author policies directly in Rsam or import them from other sources
- Map & link policies to controls, regulatory standards, risk frameworks and business objectives
- Manage policy exceptions from initial request to review, approval, expirations and more
- Automate policy updates, reviews and approvals
- Leverage out-of-the-box reports and dashboards to identify policy gaps
- Create reports from data collected in Rsam or imported from other tools

About Rsam

Rsam helps organizations meet their security, risk and compliance goals quickly, even as requirements are always changing. Our enterprise software platform uses a relational architecture and captures data in a single, centralized repository. Unlike other systems, we don't hard-wire dependencies based on requirements that were probably outdated before implementation began. Instead, the Rsam platform is built to adapt and puts the user in control. Learn more at rsam.com.
